## Reagents Auxiliaries Catalysts C C Bond Formation

**stereoselective synthesis: chiral auxiliaries** - 123.702 organic chemistry stereoselective synthesis: chiral auxiliaries • chiral auxiliary - allows enantioselective synthesis via diastereoselective reaction • add chiral unit to substrate to control stereoselective reaction • can act as a built in resolving agent (if reaction not diastereoselective) • problems - need point of attachment ... **synthesis of schiff base derived from p-aminobenzoic acid** ... - experimental materials and processing route: all materials used in this study were of analytical grade(ar). p-nitrobenzaldehyde, p-dimethylamino benzaldehyde and p-hydroxy benzaldehyde were purchased from chengdu kelong chemical reagents company (sichuan province, china) and p-aminobenzoic acid was purchased from beijing chemical reagents company (beijing, china).
